

ENVIRONMENTAL POLICY

Edelweiss S.r.l. is committed to preventing pollution, ensuring the safeguarding and protection of the environment, and pursuing continuous improvement in the organization's environmental performance by minimizing risks related to its activities and the products/services provided.

In particular, the company commits to:

- appointing a person responsible for managing the environmental aspects;
- complying with current legislation and any voluntary agreements regarding its significant environmental impacts;
- continuously monitoring the production process and environmental aspects, particularly water and energy consumption, and waste and effluent production;
- defining objectives and adopting procedures and/or operational practices to reduce water and energy consumption;
- adopting procedures and/or operational practices aimed at minimizing waste and effluent production;
- adopting procedures for the prevention and management of environmental emergencies;
- providing adequate training to company personnel on relevant environmental aspects;
- adopting an improvement program.

Furthermore, the organization commits to providing the necessary resources, technical, economic, and professional, to ensure that the objectives of the environmental policy are fully achieved.

This Environmental Policy is communicated to all levels of personnel within the organization, and it is everyone's responsibility to actively collaborate, within their competence, in improving the management of environmental aspects. The organization ensures, through subsequent verification activities, that this policy is understood and implemented, and that the stated objectives are pursued.
